CGTech opens new office in Russia

Hove, England – CGTech, the developer of VERICUT CNC simulation, verification and optimisation software, is pleased to announce the formation of a direct office in Russia. Headquartered in Moscow, the subsidiary is responsible for marketing, sales, technical support, and reseller support throughout Russia.

“CGTech is committed to customer success around the world, as demonstrated by our continued investment in local offices for direct sales and support,” said Tony Shrewsbury, CGTech Ltd. Managing Director. “There is a growing demand for simulation of complex machine tools and CGTech is well positioned to provide manufacturers with the skills and technologies they need to be successful.”

The office is located at White Stone Business Park, Floor 5, Office 524, 4-Y Lesnoy Pereulok 4, Moscow, 125047 and will initially appoint 1 Sales Engineer and 1 Technical Support Engineer, with additional Technical support provided by the UK team. “This office is a real benefit for our existing Russian customers. It strengthens our position as the worldwide leader in NC simulation, verification, and optimisation technologies,” said Shrewsbury.

The new Russian team, along with CGTech Ltd Managing Director Tony Shrewsbury, will be at Metalloobrabotka 2018, Expocentre, Moscow, between 14 – 18 May (stand 81B20) showcasing the latest version of VERICUT and introducing themselves to new and existing customers.

CGTech also recently announced plans to expand and restructure its UK operation with appointment of two new UK based Sales Engineers. Managing Director, Tony Shrewsbury, says: “The appointment of these two new Sales Engineering is testament to the positive growth plans of CGTech in the UK, and their engineering experience and close contacts within in the various industry sectors will benefit the business. Further appointments will be announced soon about the expansion of our technical support team to bolster this key service.”
