

Craftsman Capto Open Steady Rest

Machine – Puma 280

Open steady with 3-point contact

Capto - C5

Range – 20mm to 100mm

The design offers a wide range of tool support, needed to produce excellent finishes on the Daewoo Puma 280.

Nylon replaces the roller bearing supports offering a non-friction system that moulds to the diameter of your part.

It is easy to load and unload onto the machine.

The steady comes with the offer of 6 points of support rather than 3 allowing for better rigidity

Craftsman Capto Open Steady Rest

The 120-120-120 spacing of support points can be removed quickly from the frame allowing you to keep the steady on the machine when not needed for a short time.

Capto offers a quick release system with just a quarter turn to clamp offering rigid support with its unique shape

The cast iron material offers perfect damping when coupled with the capto system it substantially reduces the vibration experience when machine

The design can be easily adapted to fit other Daewoo, Hwacheon or Mori Selki Lathes
