

- **Training:** IMSM offer training to supplement your ISO. Training with IMSM is flexible and delivered by experienced IMSM Trainers.

What is involved?

- The Consultant will perform a Gap Analysis to determine where your company's processes are in relation to achieving the standard.
- If required, IMSM will develop and deliver tailored training programmes for your staff to supplement your ISO certification. This ensures a full understanding and implementation of the quality controls being put in place.
- The external audit is the monitoring of your company's conformance to the ISO standard. IMSM will continually support your organisation throughout the process as well as leading up to the audit, offering support and guidance to conformity.
- Once your organisation is confirmed as being ISO compliant, your organisation will then be presented with the ISO certificate.

Related Services

Beyond the Quality Management System of ISO 9001, IMSM can also introduce your business to a range of management system standards to help develop and grow a profitable business, including:

- ISO 14001 Environmental Management
- ISO 45001 Health and Safety Management
- ISO 27001 Information and Data Security

These standards are all designed to be compatible with ISO 9001 and can be integrated to deliver audit efficiency, consistency and optimisation. To explore the ways ISO standards can help to improve your business, contact IMSM today for an informal discussion with your local IMSM Area Manager.

Business Challenge

At the heart of a successful business is the drive to deliver quality throughout every aspect of the business. In today's highly competitive global marketplace, a strategic framework will improve and better equip your organisation to win business over your competitors.

Business Solution

ISO 9001 is the ultimate global benchmark for quality management. It is a critical tool for boosting your company's success, profitability and market potential.

Implementing ISO 9001 provides organisations with measurable improvements in their overall business performance. The philosophy behind ISO 9001: say what you do, do what you say, prove that you have done it.

What is ISO 9001?

By far the most popular and established global management standard, the ISO 9001, is currently adopted by over a million companies in 176 countries throughout the world. This ISO standard can be applied to any type or size of organisation, from small family businesses, to multinational corporations, to government institutions.

ISO 9001 will generate continual performance improvement driven by a structured yet flexible framework for a client-focused Quality Management System. The Quality Management System (QMS) framework and requirements ensure a common sense approach to the improved management of your business. The QMS is underpinned by a set of 7 principles: customer focus, leadership, engagement of people, process approach, improvement, evidence-based decision making and relationship management.

What are the benefits to your business?

- **Client satisfaction:** Consistently deliver products and client services that meet client expectation and requirements.
- **Reduce operating costs:** Improve efficiencies through the continual improvement of operating processes.
- **Improve competitiveness:** Create a higher profit potential.
- **Improve your market potential domestically and internationally:** Many procurement specifications require certification in order to supply.
- **Improve stakeholder relationships:** Develop mutually beneficial relationships and confidence with employees, clients and suppliers.

- **Demonstrate credentials:** Externally audited to recognised standards.
- **Improved risk management:** Greater consistency, accountability and traceability of products and services.
