

**[TRY OUR ONLINE COST SAVING CALCULATOR HERE...](#)**

Our online cost saving calculator requires a few simple business facts entered before you are presented with the potential savings that could be achieved using the ingenious Wogaard Coolant Saver.

**REQUEST A BROCHURE**

Our new brochure is ready, if you want to receive a copy just email us or call the number below. We look forward to helping your business make significant savings.

**Reduce**  
**Reuse**  
**Recycle**

**MONEY-BACK GUARANTEE**

Our promise: If you buy the Wogaard Coolant Saver you automatically get a 30 day money-back guarantee.

**The No1 coolant saving device**

- ◆ Up to 50% coolant saving - reduced topping up
- ◆ Reduction in disposal costs
- ◆ No manual intervention to empty coolant in swarf bin as it is done automatically when machine is active
- ◆ Manpower reduction - only swarf will require emptying from bin
- ◆ Swarf value - improved price for swarf without coolant
- ◆ Environment friendly - not only recycling coolant but NO external power required or outside coolant leaks
- ◆ Improved housekeeping with no coolant collecting outside the machine or leaking on the floor

**SEE US IN ACTION...**

We will be demonstrating the Coolant Saver on **Stand 34** at the **Manufacturing UK 2015** event, organised by the GTMA and hosted by Mazak.

With influential keynote speakers from 'high tech' manufacturing companies, such as Peter Barker, Head of Manufacturing, Cosworth and Chris Wilson, Managing Director, Messier-Dowty, Manufacturing UK 2015 provides an opportunity for you to learn more about the very latest tooling, precision machining and mould and die support available from British precision engineering companies, as well as key measurement and inspection technologies and services providers. Knowledge that could provide your company with a vital competitive edge.

**WHAT OUR CUSTOMERS SAY...**

At Manx Engineers, on the Isle of Man, our newly developed neat oil Coolant Saver is fitted to a Citizen A32 that, like many sliding head lathes, uses an expensive low viscosity oil to cool the component and the cutting tools during machining.

Part of the multinational Dover Corporation, Cook Compression has seen a number of benefits following the installation our Coolant Saver units on its CNC machine tools. Unusually, the cost-effective unit proved its worth on a band saw before being installed across the shopfloor.

[Click here to read more...](#)

At Portchester Engineering the Coolant Saver has improved housekeeping, reduced waste costs and simplified swarf disposal. Not bad for a unit that costs just a few hundred Pounds and takes minutes to install.
