New catalogue keeps things current at WNT

Supplementary catalogue highlights pace of change at WNT

Visitors to MACH 2018 will put WNT's acclaimed logistics system to the test by ordering a copy of its brand new supplementary tooling catalogue, which will be delivered to their place of work the following morning. This supplementary catalogue documents every tooling upgrade that has been added to the WNT range over the past two years and runs to almost 400 pages.

"Our standard catalogue already contains over 55,000 items, but at WNT we never stand still and in the two years since that 1200+ page publication was printed we have added to that number with a combination of brand new products and extensions to existing ranges. The new supplementary catalogue will ensure that our customers continue to have information on the latest cutting tool technology at their fingertips," says Tony Pennington, Managing Director, Ceratizit WNT Ltd.

The catalogue contains details on a diverse range of tools, toolholding and workholding and brings customers fully up-to-date with the WNT product portfolio. New products in the catalogue include HSS, solid carbide and indexable insert drilling, grooving, turning, milling, rotating toolholders and Vices. As with the main catalogue, the vast majority (in excess of 99 per cent) are available ex-stock for next morning delivery to virtually anywhere within the UK and Ireland.

The WNT Group is a sales organisation supplying precision cutting tools to the metalcutting industry. TOTAL TOOLING = QUALITY x SERVICE² - this is the formula for total customer satisfaction. Through optimal service and an unbeatable product quality WNT is the ideal purchasing solution for the metal cutting industry.

WNT is successfully represented internationally in 19 countries and has its headquarters in Germany. It is part of an international group of companies with more than 5,800 employees worldwide.
