

Release Date: 17 September 2019

Reference: PR-19-677-Ceratizit UK & Ireland-Spindle Tooling Offer

## Massive savings on spindle tooling from CERATIZIT's Team Cutting Tools

Team Cutting Tools from CERATIZIT is delivering major savings to machinists with its latest special offer on spindle tooling from its Performance and Standard tools range. The offer includes a wide and diverse range of spindle nose tooling that is subject to a discount of 77 per cent over standard list prices and is available to new and existing customers.

Adapter types included in the offer are SK 40, SK 50, BT 40, BT 50 and HSK 63, which can be supplied with choice of front end toolholding systems ranging from sidelock, ER collet, drill chuck, shell mill, hydraulic, and heat shrink styles. Accessories such as pull studs, coolant pipes and ER standard and precision collets are also included in the offer. "As a group we have invested heavily in stock of these products to be able to present customers with this significant discount on our normal list price for spindle tooling," says Tony Pennington, Managing Director, Ceratizit UK & Ireland. "By investing in this way, we are not only able to deliver these products at a highly competitive price, we can also guarantee next-day, before noon, delivery from our logistics centre."

Spindle tooling is a vital component of cost-effective machining, so this offer, which runs until 31 May 2020 provides the perfect opportunity for machinists to equip themselves with high quality, high performance, adapters such as CERATIZIT's Shrink Fit and high pressure chucks from the WNT product brand with a significant price advantage. With the offer covering both the Performance and Standard ranges of spindle tooling again, there is a choice in what level of investment users want to make. The WNT Performance range are the company's premium products that are aimed at delivering outstanding performance in demanding applications. The WNT Standard range is made up of adapters that are seen as higher volume for general application, but they are manufactured in higher volume to affect the price point, while maintaining high levels of quality and performance.

### **CERATIZIT – Passion and pioneering spirit for carbides**

For over 95 years, CERATIZIT has been a pioneer developing exceptional hard material products for cutting tools and wear protection. The privately owned company, based in Mamer, Luxembourg, develops and manufactures highly specialised carbide cutting tools, inserts and rods made of hard materials as well as wear parts. We are the market leader in several wear part application areas, and successfully develop new types of carbide, cermet and ceramic grades which are used for instance in the wood and stone working industry.

With over 9,000 employees at 34 production sites and a sales network of over 70 branch offices, the Group is a global player in the carbide industry. Our international network also includes the subsidiaries KOMET, WNT, Becker Diamantwerkzeuge, and Stadler Metalle, as well as the joint venture CB-CERATIZIT. As a leader in materials technology, we continuously invest in research and development and hold over 1,000 patents. Our innovative carbide solutions are used in mechanical engineering and tool construction and many other industries including the automotive, aerospace, oil and medical sectors.

We are active on the market through the seven competence brands Hard Material Solutions by CERATIZIT, Toolmaker Solutions by CERATIZIT, Tool Solutions by CERATIZIT as well as Cutting Solutions by CERATIZIT, KOMET, WNT and KLENK.
