Join KYOCERA SGS at EMO Hannover 2019

Leading precision cutting tools manufacturer, KYOCERA SGS, is set to showcase its products at EMO Hannover 2019 from the 16th to the 21st September. As the world's premier trade fair for the metalworking sector, EMO has a reputation for attracting major players in the machinery and plant manufacturing, automotive, aerospace and other industries. This year's event is no different. KYOCERA SGS will be joining other global production technology manufacturers highlighting smart engineering under the motto of "Smart technologies driving tomorrow's production".

EMO Hannover is not only about gaining insights into new technologies, technical solutions and support services but also about nurturing connections between businesses. KYOCERA SGS will play a key part in this at Booth E70 in Hall 5 throughout the week.

KYOCERA SGS will be presenting live demonstrations on its GROB machine, allowing visitors to see in real-time exactly how its tools can boost productivity. As well as viewing interactive digital displays, brochures, tooling samples and finished products and enjoying giveaways and refreshments, customers and visitors to the booth will also have the opportunity to sit down with KYOCERA SGS's EU Sales Engineering team and Technical and R&D Managers.

David Colton, KYOCERA SGS's European Sales Director, comments:

"Our business is built on making great connections, not only by supporting new customers but through collaborating with partners. As part of this, we are delighted to be playing a key role as an exhibitor at EMO Hannover 2019. We look forward to catching up with customers and meeting potential new contacts. We would be pleased to welcome our customers and partners to our booth, as well as anyone else interested in making their production processes more efficient and profitable."

In industry, finding new ways to enhance productivity often begins with a conversation, an idea shared or an insight into a particular process or approach. KYOCERA SGS look forward to helping businesses to benefit from that at Booth E70, Hall 5 at EMO Hannover 2019.
